

Square Steel Light Poles

Specifications

Pole Shaft: Constructed from high-strength steel tubing, these poles are available with side drilling for arm-mounted area lighting luminaires or with tenon mounts for flood and post-top luminaires.

Finish: The poles feature a textured architectural powder-coat finish in bronze, black and white, baked to ensure maximum paint adhesion, durability, and resistance to wear.

Hand Hole: A cast iron-reinforced hand hole with a grounding provision is located 1'-6" from the base. It includes a secure cover with attachment hardware, designed for easy electrical connections and maintenance.

Surface Treatment: The poles are hot-dip galvanized for superior corrosion resistance, providing a long-lasting protective layer.

Accessories Included: Each pole comes with a base cover, screw positioning plate, anchor bolts, and all necessary mounting hardware.

Optional Accessories: Top options include Tenon Top, Top Cap Only, or Open Top, typically used when the pole top diameter matches the required slip-fit dimensions.

Design Criteria: Standard EPA and weight values are based on commercial criteria with a 1.3 gust factor for side-mounted fixtures. For pole-top mounted luminaires or brackets, please consult the factory for additional loading criteria. Proper foundation design is essential for optimal performance.
